Application/Control Number: 09/702,037 Page 2

Art Unit: 1651

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-4 and 11-27, drawn to a composition and methods for its use, classified in class 424, subclass 520.
 - II. Claims 5-10, drawn to a method of producing a food composition and food composition produced by the method, classified in class 435, subclass 392
- 2. The inventions are distinct, each from the other because of the following reasons:

 Inventions II and I are related as process of making and process of using the product. The use as claimed cannot be practiced with a materially different product. Since the product is not allowable, restriction is proper between said method of making and method of using. The respective product claims of Group I or Group II will be examined along with the appropriate elected methodological invention(s) of Group I or Group II. Furthermore, the composition of claims 1-4 may be prepared by a different method wherein different process steps are used, such as in place of using ultra-filtration, a different isolation process may be applied as for example filtration via the use of a micro porous sieve in a bioreactor and centrifugation as well as the application of freeze drying in place of spray drying. In addition the product obtained by Group II may be different than the product of Group I in that in Group I the growth factor is IGF-1 of which is not required of the product of Group II. Therefore, there is two way distinctness between the products of Groups I and II, as well.

Art Unit: 1651

3. Because these inventions are distinct for the reasons given above and have acquired a

separate status in the art as shown by their different classification, restriction for examination

purposes as indicated is proper.

4. A telephone call was made to W. Evans on March 21, 2002, to request an oral election to

the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an

election of the invention to be examined even though the requirement be traversed (37

CAR 1.143).

5. Any inquiry concerning this communication or earlier communications from the examiner

should be directed to Deborah K. Ware whose telephone number is (703) 308-4245.
